

Alpha - Bet Handbook

Vetted's Entrepreneurship Program

Welcome to Alpha-Bet and to the Vetted Community.

First of all, we want to thank each of you for choosing to join us. As we watched your application videos, we were continuously humbled by the caliber and experience of this group.

As we launch into this next class of combat veterans, we are seeing a remarkable upward tick—not just in the quality of individuals logging in on day one, but in the profound transformation that happens from your very first session to graduation. Where you start this program is simply your launching pad; where you finish is a testament to what you are truly capable of achieving.

We know from experience that the transition back into the civilian world can be challenging and lonely, especially coming from combat service. It's easy to feel like others have a head start, without realizing how much your service has already given you.

This program was built on the foundation of the Vetted Mission: empowering veterans to translate their extraordinary military experience into world-class civilian leadership and entrepreneurial success. But tools and frameworks are only half the equation. The real engine behind this experience is this community. Even across screens and time zones, the bond you share with your cohort, alumni, and mentors will become one of your greatest assets.

You've already proven your resilience in some of the toughest environments on Earth. Now, it's time to channel that same grit, discipline, and purpose into your next mission. We are honored to walk this path alongside you.

Work hard, lean on your peers, and let's get to work.

Warmly,
Nuri Golan & Adam Weiner
General Partners, Vetted

Operator Checklist

This handbook is your guide for the program - expectations, structure, schedule, and resources. Keep it handy throughout the program. As you go through the handbook, keep in mind the below tasks you are to complete prior to your first lecture.

- ☐ Review the full Alpha-Bet Handbook
- ☐ Join your Google Classroom
- ☐ Join the shared class calendar and make sure your personal calendar reflects these events
- ☐ Familiarize yourself with the lessons via the program schedule
- ☐ Make the program commitment payment [here](#) by Wednesday, October 7th
- ☐ Complete your Entrepreneur profiles via [THIS FORM](#)

Vetted's Mission & Vision

Vetted is a first-of-its-kind entrepreneurship program for Veterans / Reservists of **both the US Armed Forces and Israeli Defense Forces**. Vetted Operators advance their knowledge of entrepreneurship and their early-stage ventures through a “battle-tested” dedicated curriculum and training program designed for Veterans / Reservists.

The mission is to become the **first touch point for Veterans / Reservists who are interested in becoming entrepreneurs**. We will give them the knowledge, tools, and network to pursue a career in which their unique experiences can be harnessed into excellence.

We will create the **next generation of military-turned civilian entrepreneurs** by providing them the knowledge, network, community, and purpose to succeed in the next chapter in their lives.

Why Combat Veterans?

Our Focus: Translating Combat Experience into Entrepreneurial Success

At Alpha-Bet, we hold the deepest respect for every individual who has served. Our program is deliberately designed for combat veterans because our curriculum is built to translate the unique experiences of frontline service into a successful entrepreneurial career.

First, we help combat veterans recognize and reframe the powerful skills they already possess. The ability to lead small teams, make critical decisions under extreme uncertainty, risk analysis, and execute a mission with limited resources are the essence of entrepreneurship. Our training shows you how planning an operation is analogous to developing a market-entry strategy.

Second, we bridge the skill gaps that often exist after years of operational focus. Frontline service builds incredible leaders, but it doesn't typically teach financial modeling, marketing analytics, or the art of effective **storytelling** and **networking**. Alpha-Bet provides targeted instruction in these crucial business fundamentals catered to the combat veteran.

By limiting the cohort to veterans with a shared combat background, we create a high-trust environment built on mutual understanding. This fosters unparalleled peer support, allowing participants to not only build a business but also engage in a process of mutual growth and recovery.

Program Overview

Alpha-Bet is a 10-week hybrid program designed to give combat veterans practical experience in entrepreneurship. Participants will ideate, validate, and pitch startup concepts through a mix of classes, labs, mentorship, and teamwork.

Participant Expectations

- Commitment to ~10–12 hours per week over the program duration.
- Should have an early-stage idea or interest in exploring entrepreneurship.
- Willingness to engage in teamwork, mentorship, and structured assignments.
- Uphold professionalism, respect, and confidentiality throughout the program.

Program Structure

Each week participants will engage in a mix of cohort sessions, small group labs, mentorship, and independent work. Labs emphasize applying weekly lessons to real-world problems, while mentors provide tailored guidance.

Weekly Flow

- Class Lectures (2.5 hrs): Core instruction and discussion.
- Small-Group Lab (2 hrs): Hands-on team application of lessons.
 - Mentorship: Weekly check-in with experienced mentors during the lab sessions.
- Independent Work: Research, interviews, or prep assignments.
- Office Hours: Not mandatory but highly recommended and requires registration, see [Office Hours section](#).

Program Goals:

- Provide a deep understanding of the fundamentals of entrepreneurship.
- Provide a deep understanding of the full entrepreneurial process.
- Enhance Ideation and Creativity techniques.
- Gain experience in planning a venture.

- Determine and validate the business and strategic plan needed to build a strong foundation for venture creation.
- Practice team building and team dynamics.
- Practice presenting ideas in various stages.
- Participate in experiential exercises built around core entrepreneurial terms.
- Integrate Generative AI as a catalyst for creativity, research, and execution in the entrepreneurial journey

Alpha-Bet Objectives:

- Provide each **operator** with a deep understanding of the full entrepreneurial process, from fundamentals to execution.
- Help each **operator** gain practical experience in planning, validating, and building the strategic foundation for a new venture.
- Enhance each **operator's** ideation and creativity techniques.
- Allow each **operator** to practice and refine critical skills in team building, team dynamics, and presenting ideas.
- Engage each **operator** in experiential exercises built around core entrepreneurial concepts.
- Guide each **operator** to integrate Generative AI as a catalyst for creativity, research, and execution in their entrepreneurial journey.

(Break out rooms)
3*	Class: October 26 th Lab: October 29 th *5pm IL, this week only due to daylight savings ends	The Lean Startup - Lean Startup Methodology - Introduction to the Business Model Canvas/Lean Canvas	In-Class Exercise: Blind Business Model Canvas Deadline: Teams must be finalized prior to lab- all class work is done in teams from this point. Register your team (name and members) via a dedicated sheet	- Choose the idea the team will focus on for the program - Teams work on their BMC • AI supported initial market research
4	Class: November 2 nd Lab: November 5 th	Landscaping - Market Analysis Essentials - TAM/SAM/TM - Segmentation - Personas - Competitive analysis and landscaping	In class Exercise: - Build two customer personas - Segmentation Homework: - Complete TAM/SAM/SOM or Petal Diagram - Conduct one interview (potential customer or expert) Prepare a 1-minute pitch for your venture for the lab session	- Create a persona profile for your potential target customer - List at least 3 direct and/or alternative competitors - Define what differentiates you from each competitor - Visualize your competitive landscape using one of the methods we learned (Harvey or Petal) - Identify 3 potential customers and 3 experts (for interviews)
5	Class: November 9 th Lab: November 12 th	Customer Discovery Lecturer: Prof. Tommy Knapp - Customer Discovery - Value proposition - Validation - Interview strategies - Outreach tricks and tips - MVP Strategies	Homework: - Conduct 5 interviews with potential customers - Derive 3 insights re your hypothesis	- Revisit initial assumptions regarding Customer Segments. - Write the main hypothesis you wish to validate through interviews. - Develop semi-structured interview guides for potential customers and industry experts.

PROGRAM STRUCTURE: OCTOBER - DECEMBER 2026

WEEK	DATE	TOPICS	CLASS ACTIVITIES AND ASSIGNMENTS	LAB
6	Class: November 16 th Lab: November 19 th	The Network Lecturer: Nuri Golan/ Adam Weiner - Mapping, building and utilizing your network - Outreach skills: LinkedIn, email, conferences	Homework: - Work on presentation • One pager - Reach out to 5 connections (email / LinkedIn / call) - Finalize presentations/One pager Before week 10 must present to a staff member during office hours	- Continue polishing your presentation. - Include visual representation of your product/solution Use case. (Mockup/screenshots, webpage etc)
7*	Class: November 23 rd Lab: *Tuesday, November 24 th	Storytelling for Ventures - Guest Lecturer: Oded Lavie Final Presentation components - Lecturer: Nuri Golan/ Adam Weiner	In-Class Exercise: What is your venture's story?	- Building final presentation flow. - Create a clear story and structure. - Incorporate positioning & branding.
8	Class: November 30 th Lab: December 3 rd	Business Plan • MVP - Business Strategy - Business Models - Business plan essentials Revenue Models	In-Class Exercise: - Build Initial Business Plan 1 Minute team pitch Homework: - Finalize Business plan • Model - Create and upload a 1 minute pitch video for Lab session	- Revisit your 1 min pitch. Review and rewrite it using the 5Ws framework - What is your business model? - Based on what you learned last class about outline the key 3-4 milestones for the near future. - Identify your riskiest assumption and match MVP for validation
9	Class: December 7 th Lab: December 10 th	Legal and financial aspects of a startup Lecturer: Nuri Golan/ Adam Weiner - Key financial concepts - Key legal considerations - SAFAs as an early stage fundraising document	Homework: Deadline: Submission of all class requirements: - Draft an MVP Budget Plan - Team: Presentation deck, One pager - Submit video of your presentation	Dry Run
10	*Team Presentations: December 14 th & December 15 th	Team Presentations (5 minutes) and feedback		

Graduation Criteria

- Full participation as mandatory attendance is required.
- Completion of weekly labs and deliverables.
- Completion of peer feedback.
- Contribution to group work and final team project.
- Final score of 7/10 or greater on final presentation.
- Must receive a passing grade from **two** of the following three: Lecturer/Lab Lead/Mentor

Attendance

- **Attendance in all class and Lab sessions is mandatory.** Class attendance is very important as in an area like entrepreneurship, learning occurs through interaction and hands-on work.
- If you cannot attend a class, you must notify and receive approval from administration at least 24 hours in advance.
- Mandatory full attendance at dedicated mentor meetings, and submission of meeting summaries.

Active Class Participation

- You are expected to come to class well prepared and to participate in class discussions.
- Teamwork is an essential component of this class. Be respectful of your team members and be an active member of the team.
- On zoom, this means **activating your camera**, answering questions, and participating in discussions
- You may only participate in the class group to which you are assigned, as teamwork is an essential part of the program.
- During classes, teams will present their progress periodically through short presentations. All students are required to provide feedback to their peers on their presentations.

Recitation/Mentorship sessions

- **Mentorship** - each team will work with multiple experienced industry mentors during the lab sessions. It's up to the team to utilize the network of mentors and schedule outside office hours with them.

Program Fee

Program FeeThe Alpha-Bet program fee is \$200 / 500 NIS IL. This fee covers all program materials and mentorship.

Payment through PayPal:

The program fee will be collected through PayPal [here](#). Payment is due by Wednesday, October 7th, before the program begins. Please ensure your PayPal account is set up and ready for transactions to avoid any delays in your enrollment. If you encounter any issues or have questions regarding payment, please contact the Program Manager, Eden eden@thevetted.vc.

Resources & Support

Alpha-Bet Classroom: Your Central Learning Hub

Welcome, **Operator**! Your primary platform for Alpha-Bet Class #003 is Google Classroom. Consider this your **Central Learning Hub**—the dedicated space where you will receive program instructions, access resources, interact with your peers and Lecturers, and submit all completed assignments.

This platform is crucial for the successful completion of the program and for staying informed about all official communications from your Lecturer.

** [Here](#) is a quick tutorial of the Google Classroom platform for you to review. Below you will find more information relevant to this program.

Accessing the Platform

You'll need an **active Google Account** in order to access the Google Classroom. This might be a personal Gmail address (e.g., yourname@gmail.com) or a google workspace account (e.g., yourname@domain.com).

** NOTE: If your application email isn't a google backed account, please create one and provide it to Eden so you gain access to the Google Classroom and everything you need for the program.

1. **Join the class using this invite:**
<https://classroom.google.com/c/ODcxODcyNjY4NzAz?cjc=rezxaejv>
2. **Join the class manually:** Navigate to <https://classroom.google.com/>, click the “+” icon in the top right corner and enter the Class Code **rezxaejv**

Once inside, you will see the three primary tabs for program management:

Tab	Function (Your Role)
Stream	Announcements & Updates: This is the main feed for class news, important notifications, and quick links from your Lecturer . Check this regularly for urgent information. Operators will also be able to ask questions or add comments here when necessary.

Classwork	Assignments & Resources: This is where all graded activities (Assignments), essential documents (Program Materials), and study materials are stored and organized by topic. This is your most critical tab. Groups A and B will have their individual folders per lesson. The Lab will be available to all and will be the dedicated folders to submit your assignments.
People	Staff & Class Members: View the list of your Lecturers and your fellow Operators.

Submitting Assignments

All official assignments must be submitted directly through the **Classwork** tab > **Lab Folder**.

1. **View Assignment:** Click on a specific assignment to open its details. Review the instructions and any attached resources carefully.
2. **Complete Work:** Create your submission (document, presentation, image, etc.) using the required software.
3. **Attach & Submit:**
 - If you created the document *outside* of Google Classroom (e.g., on your computer), click **+ Add or create** and upload the file.
 - If the **Lecturer** provided a template (a copy of a Google Doc/Slide for you), simply open it, complete it, and click the **Turn in** button within the assignment view.
4. **Confirm:** Always ensure the status changes from *Assigned* to **Turned in** or *Done*.

Receiving Review & Feedback

After your **Lecturer** reviews your **assignment**, you will receive feedback and a grade (if applicable) through Google Classroom.

- You will receive an email notification when your **assignment** has been graded or returned with comments.
- You can view detailed feedback directly on the assignment page in the **Classwork** tab. Use this feedback to improve your future performance.

Alpha-Bet Calendar

Subscribe to our shared Class#003 Google Calendar which is the source of truth for all program-related sessions, ensuring everyone stays informed and aligned. It will include details for every lesson and lab, including the date, time, location, and guest speakers. You will also be able to view assignment due dates and anything else required for each lesson.

Please ensure you have access, add it to your preferred calendar app on your phone, and enable notifications so you receive updates. It is your responsibility **to subscribe** and to check on a regular basis for assignments and updates. Once you join the Google Classroom, you will be able to see all events by clicking the calendar icon in the top right corner from the classroom main page.

Subscribe at this link: [Alpha - Bet Class# 003 Calendar](#)

Office Hours and Communication

Please use the Google Classroom **STREAM** for all lecture related communications. Check this regularly for urgent information. Operators will also be able to ask questions or add comments here when necessary.

Program lecturers and guest speakers have allocated blocks of time for you to join their Office Hours throughout the duration of the program. This is time for you to discuss specific topics from lessons, review any assignments and/or get advice on your venture if relevant. Don't wait until the last minute to ask questions, utilize the team and resources this program has to offer.

Fill out the forms below and select the day/times you would like to join; once approved Eden will add you to the meeting. You can always visit the handbook to gain access to each person's form OR see the office hour blocks on the shared class google calendar where forms will be available in the description to fill out. If you cannot attend a scheduled office hour meeting, please notify Eden Golan at least 24 hours prior.

Request to join the office hours by filling out the form: <https://forms.gle/WKxYiNnvqwbYBFxz8>

Etiquette + Code of Conduct

Zoom Lecture Etiquette Tips

- Mute Your Microphone: Keep your microphone muted at all times unless explicitly asked to speak. This prevents background noise from disrupting the lecture.
- Use the Chat Respectfully: Use the chat function for relevant questions or comments throughout the lessons. Avoid side conversations or distracting comments.
- Video On (Be Mindful): Keep your video on to show engagement and presence. Ensure your camera is stable, your background is neutral (use a virtual background or blur if preferred). Maintain minimal movement to avoid distracting the lecturer or other attendees.
- Be Present: Close unnecessary tabs and focus your full attention on the lecture, just as you would in a physical classroom.
- Use Handraising Feature: To raise your hand in Zoom, click "Reactions" and select "Raise Hand." To lower it, click "Reactions" and then "Lower Hand".

Mentors / Guests: Our mentors and guests volunteer their time because they believe in Vetted's mission. The respect we show them directly affects their willingness to contribute in future semesters. **Actively engage** with them beyond classroom and online sessions. They are eager to help, so make the most of their expertise. **Being timely and respectful** with your responses is essential. If connected with someone, **aim to be the first to respond**, express gratitude, and take the lead in nurturing the relationship.

Frequently Asked Questions

Program Logistics

- What should I do if I can't join a lesson due to a conflict?

If you cannot attend a class, you must notify Eden our Program Manager and receive approval from administration at least 24 hours in advance. We will work with you on rescheduling or giving you the right guidance on next steps in order to keep you and your work on track.

- How much time should I expect to dedicate each week?

Plan for **8–10 hours per week**, which includes two live sessions, group work, and mentor engagement. Consistent participation is the single biggest driver of success in the program.

- What happens if I fall behind on assignments?

Participation and timeliness are mandatory. If you fall behind, you should communicate with your **mentor and Eden** immediately — there are office hours and catch-up options to help you stay aligned with your team and deliverables.

- Are all sessions recorded?

Sessions are hosted via **Zoom**; meetings are recorded for our class operators through the program's **Google Classroom portal**, where all materials and announcements (including reminders) are centralized.

- Will I receive reminders for live sessions?

Yes. You are instructed to subscribe to the shared Google Calendar, add it to your preferred calendar app, and **enable notifications** to receive all program updates and session reminders.

- How are teams formed, and can they change mid-program?

Teams are formed early in the program (Week 1) following a skill questionnaire and team skill set discussions, after which you must finalize your work teams. Once finalized (by the Week 2 or 3 deadline), all class work is done in these teams. Any changes should be discussed with our Academic Staff, please reach out to Eden.

- What tools or platforms do we use (Zoom, Slack, Notion, etc.)?

The primary platforms are **Google Classroom** (Central Learning Hub, assignments), **Google Calendar** (schedule, updates), and **Zoom** (live lectures and labs). Expect occasional emails throughout the program.

- How can I communicate with others in the program?

You should use the **Google Classroom STREAM** for all lecture-related communications, including asking questions or adding comments. For administrative questions or technical support, contact the Program Manager, Eden Golan. You will have access to the other Operator's contact information as well.

- Is there a code of conduct or attendance policy?

Attendance is required for all sessions. Respectful, professional interaction — especially within multicultural, U.S.–Israel teams — is expected as part of the **Alpha-Bet Code of Conduct**.

- What happens if I experience technical issues during a session?

If you experience connectivity or technical difficulties during a session, contact **Eden Golan**; recordings and summaries can be provided afterward.

- Who do I contact for administrative questions or tech support?

Program Manager (Admin & Tech): Eden Golan

Lecturers/Mentors: Ofir Richman, Uri Mestechkin, Dr. Gali Einav

- If I come up with a new idea during the program, can we change it?

Yes, but only if your full group agrees and you receive approval from the staff. Pivoting is part of entrepreneurship, but we'll help ensure it's a strategic decision, not a distraction

Mentorship & Learning

- How are teams to work with mentors?

During each lab session, a handful of **mentors** — typically an experienced entrepreneur or investor will join a team for some dedicated one-on-one work. Mentors and program staff will work together to make sure teams get appropriate and effective support. Teams will have the opportunity to schedule one-on-one time with mentors of their choice outside of the dedicated lesson and lab hours if desired.

- What are mentors expecting from me as a founder?

Show up prepared, communicate proactively, complete assignments, and engage with feedback. Mentors serve as accountability partners, not project managers.

- Are there office hours or open mentoring sessions?

Staff and mentors hold rotating office hours; times are available in Google Classroom and on the shared Google Calendar. You must request to join office hours via the forms available in the Classwork tab or above in this handbook.

- Can I connect with mentors outside of my assigned group?

Yes, based on their availability.

- How can I get feedback on my pitch or idea between sessions?

You can use the **Office Hours** with lecturers and guest speakers, as this time is specifically designated to "get advice on your venture if relevant" and review assignments. You can also speak with your peers who will be providing peer feedback on your presentations.

Teamwork & Group Dynamics

- Can I be placed with my friends in the same group?

Some Operators have requested to be with friends in the same group. If you are in the same Group, it's possible. Teams are formed based on a skill questionnaire and team discussions to ensure a strong team skill set, and you must finalize your work teams.

- What should I do if there's conflict within my team?

Discuss issues directly within the team first; if unresolved, mentors and Eden can mediate.

- What if a teammate drops out mid-program?

Depending on the situation we will work with you and your team to either continue as is or join another team.

- Are leadership roles assigned or chosen within groups?

Teams self-select leadership roles, though rotating facilitation is encouraged.

- Can groups collaborate or share ideas with other teams?

Yes — there are joint sessions and networking activities where inter-team idea sharing is encouraged.

- How are team deliverables graded or reviewed?

Deliverables are reviewed weekly in labs and evaluated based on completion, quality, and engagement, not grades.

Curriculum & Assignments

- How are weekly assignments evaluated?

Assignments are reviewed weekly by mentors and instructors for progress and comprehension.

- Is there a final project or presentation?

The program culminates in a **pitch presentation** to investors and faculty.

- How much of the program is theory vs. practical application?

Roughly 30% theory and 70% applied learning — including labs, case studies, and venture-building exercises.

- Are there guest speakers or live case studies?

Yes, there are frequent appearances from founders and investors throughout the program.

- Will we get templates or tools for customer discovery, business models, etc.?

Participants receive structured templates for customer discovery, business models, and storytelling as part of the weekly modules.

- Can I work on an existing company instead of a new idea?

If it is an existing business, you should discuss with us first as there could be issues with having teammates work on your business without them being compensated

- Can I work alone on my Venture idea without a team?

Solo ventures are not allowed — all work is team-based to foster collaboration and shared learning.

Networking & Community

- How can I connect with the Vetted alumni network?

Graduates join the **Vetted Alumni Network**, gaining access to founders, mentors, and service providers. There are community Whatsapp groups and events.

- Are there opportunities to meet investors?

Yes, we will have a few investors take part in the final presentations week while some of our mentors are investors as well. If you have a legitimate business ready after the program we will also introduce you to investors

- Is there a community platform after graduation?

Vetted hosts **online and local meetups**, as well as founder groups and reunions.

- Can I invite guest advisors to review our work?

You may invite external advisors with staff approval to join your mentor sessions or review deliverables.

Post-Program Path

- How are Alpha-Bet graduates selected for the Vetted Accelerator?

Top-performing teams are automatically considered for the next Vetted Accelerator cohort. You can also apply directly if your venture is ready for investment-level engagement.

- When will I find out if my team is invited to advance?

Advancement invitations are typically communicated shortly after the final presentations.

- Can I stay involved with Alpha-Bet as a mentor or alumni leader?

Yes! We love when graduates pay it forward to help the next cohort.

- Is there funding available after graduation?

Investment opportunities are available via the **Vetted Accelerator** for selected ventures.

- Can I apply to Vetted Accelerator while still in Alpha-Bet?

Absolutely. We love to see teams jump straight from Alpha-Bet to the Vetted Accelerator. Top-performing teams are automatically considered for the next cohort. You can also apply directly if your venture is ready for investment-level engagement.

Other Practicalities

- Do we receive a certificate upon completion?

Yes — issued upon successful completion of all modules and participation requirements.

- How do I list Alpha-Bet on my résumé or LinkedIn?

Participant, Class#003 - Alpha-Bet Entrepreneurship Program by Vetted. Reach out to Eden for specific instructions.

- What should I prepare before the first session?

Make sure to review the Operator's checklist at the beginning of this handbook and check your Google Classroom "Classwork" tab which will have a list of items to review and complete prior to the first session.
